I am writing to oppose HR 4026 and support XM Radio; especially XM Instant Traffic and Weather. I live in the San Francisco bay area and I can tell you from experience that the traffic reports given every 8 minutes on 740AM and 810AM are more often than not woefully inaccurate. In addition there are so many problem areas within the Bay Area that they can only cover a small portion of the traffic problems/slow downs in the 1 minute they are allotted. I elected to get XM radio before I knew about the Instant Traffic and weather and it has repeatedly proven to be a time saver! I listen and even contact my friends who don't have XM Radio, to update them on THEIR commutes!
